- No Bump Steer!
- 3° Camber Change Throughout Travel
- 5° negative caster built-in for rough terrain
- Correct Incline Angle & Ackerman
- TRUE, USEABLE WHEEL TRAVEL

TIMMY'S WILL SOON BE
CHANGING THEIR NAME TO

Timmy's Buggy's is the manufacturer of high quality, tacked kits to turn key custom sand cars and a full line sand car parts supply.

Born and raised on the Oregon dunes in Winchester Bay/Reedsport, Oregon, Tim Luke has bought, built, bent and broken just about every kind of old technology sand car out there. Over the years, he has experienced the frustration of having difficulty finding quality parts and technical support.

Knowing that he could offer customers a better buying experience and product, Tim opened **Timmy's Buggy's** to serve the sand car community. Tim's crew has EXTENSIVELY tested and proven their car's design to provide a high-flying, agile sand car that will handle any terrain, not to mention an exhilarating experience.

Timmy's Buggy's offers many choices of chassis, from tacked frames, to turn key mid and long-travel sand cars. Let **Timmy's Buggy's** turn your dream of a high-performance sand car into a reality today!
